Ecological problems in Mendur Sokkon

2017

- The **aim** is to draw the audience's attention to today's problem of environmental pollution.
- The **tasks** are:
 - to indicate today's environmental situation in the world and directly in Mendur-Sokkon village with the help of the project poster, pictures and graphs;
 - to make up a plan of school activities to protect Mendur-Sokkon nature and to reduce the litter;
 - to engage Mendur-Sokkon school pupils and local people in environmental activities;
 - to cause a sense of responsibility for the protection of the Earth.

Earth Day takes place in Russia

April 20, 2017
The Milky Way Galaxy
The Solar System

Dear Earthmen,

I'm writing to express my dissatisfaction with your careless attitude towards me for the last times. I've got ill! I am unable to cope with all the troubles you are causing day by day.

I'm suffering from the lack of clean air! Every day I breathe hundreds of thousands tons of your vehicle and industrial hazardous emissions to the atmosphere! Every day thousands of my forests are being burnt and cut down.

I'm choking with the trash you have thrown away! All my lands, forests and waters are drowning in litters. Every one, look around right now! What do you see?! There are candy wrappings, boxes of biscuits, cartons and bottles of juice, plastic bags everywhere!

All in all, I'm extremely disappointed. But deep inside I hope and believe you will change. Unless you start protecting the nature, neither healthy nor wealthy you will be.

Yours,
Earth.

The Earth's Moan

I'm suffering
from the lack
of clean air!

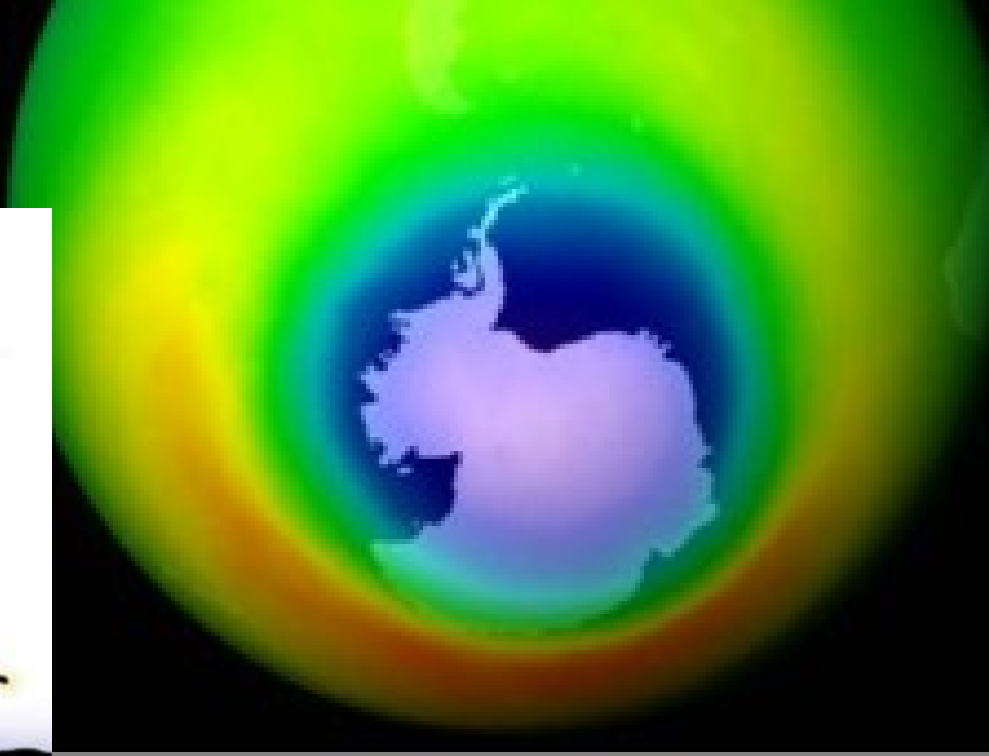

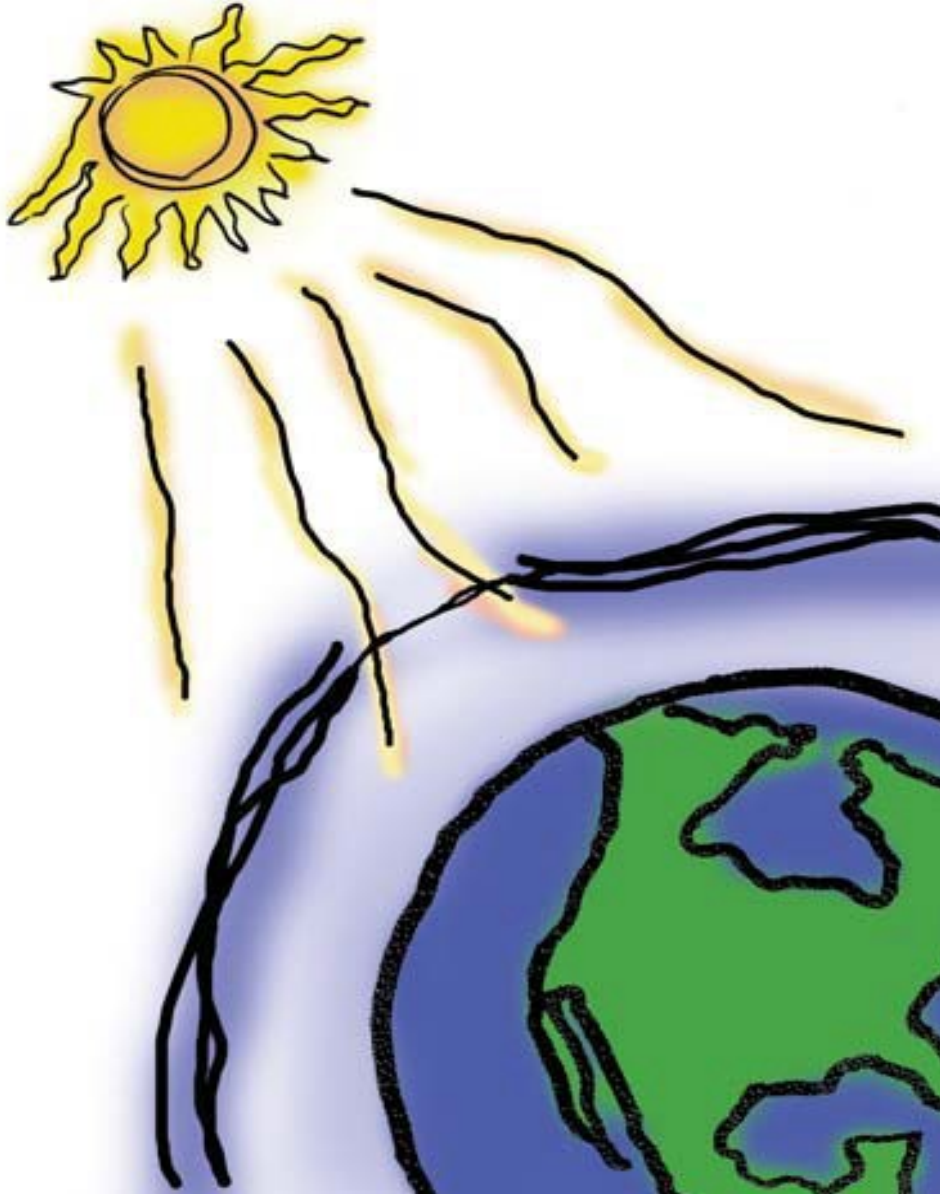

I'm choking you
I've thrown away!
I've thrown away!

Take care of
me!

I've got
a headache!

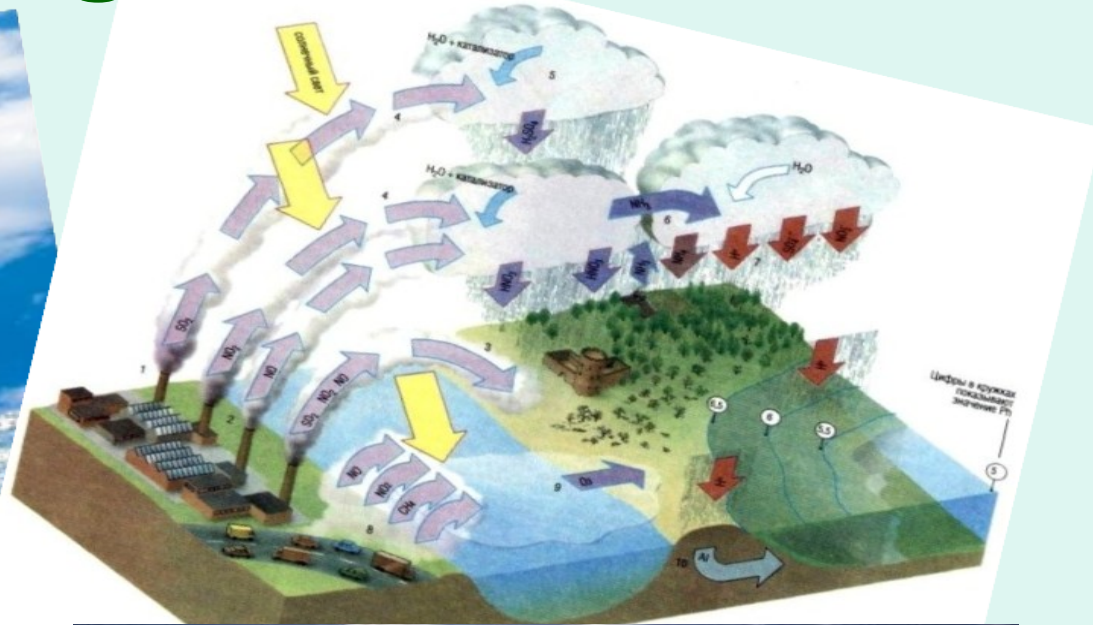

OZONE HOLE

- When the **protective ozone layer** is damaged, there is an increase in harmful rays from the sun reaching the Earth. These rays can harm both health and the environment.

Global warming

Acid Rains

Desertification

Ecological problems in Mendur-Sokkon:

- **Smog**

Litter in the streets

Litter in the forest

Cars

School ecological activities - solution the problem:

- the cleaning of the schoolyard, stadium, forest and spring territories;
- leading ecological discussions among the pupils;
- planting flowers and trees;
- handing out instruction leaflets with the rules of reducing and minimizing the pollution in villages

We are working on the problem

More oxygen to the air!

Let There Be Green Earth!
